This assignment is a bit shorter than usual, in recognition of the fact that it's due on the same day as our Exam A. As always, if you feel that you need more practice, then do more problems from the textbook, or talk to me. :)

1. Section 13.3 #6.

2. Section 13.4 #34.

3. Problem D from the calculusCurves.pdf handout on our course web site. (By the way, I fixed a typo in this problem around midday on Wednesday. So, if you obtained a copy before then, then make sure you're working from the current version.)

4. Problem E from that same handout (which is a continuation of D).

5. Problem F from that same handout (which is a continuation of E).
