

First, I have sent you e-mail with subject “Math 134: survey”. Please reply to that e-mail today (Wednesday), so that I can set office hours on Thursday. What if you’re late? Should you still reply? Yes, please!

Second, you have some problems to solve. As the schedule says, they are due on Day 4 (Monday), on paper, at the start of class.

- Section 1.1 #7, 8, 11, 15, 21.
- Section 1.3 #1, 9, 35, 37.

By the way, if you want more practice in solving systems of linear equations, then read Section 1.2 and practice some of its problems. That’s what that section is all about. On an exam, I will definitely ask you to solve a system of linear equations by hand. But I will not ask you to manually solve systems with more than three variables. :)
